

Add Domain and User to MXRouting

Aug 2024

WARNING!!! - THIS GUIDE IS NOT YET COMPLETE!!! - WARNING!!!

Introduction

This is a quick overview on how to add a Domain and User to MXRouting, while this is pretty simple, we will be able to get the information we need for creating some mail records on our Domain host, which is very important.

Add Domain

Login to MXRouting MXRouting and go to Domain Setup.

Click Add New.

Enter the new Domain Name and click Create.

Add User

Now that we have created our Domain, we can add a user to it.

In MXRouting, expand the E-Mail Manager menu and select E-Mail Accounts.

Ensure that in the Top Right of the screen you have the correct **Domain** selected (the one you just added). Then select **Create Account**. There will already be a default user here called ukgreenn that you can ignore.

Create Mail Account

Username

he

@therlowe.uk

Password

E-mail Quota (MB)

0

☒ Max

Daily Send Limit

7200

☐ Max

CREATE ACCOUNT

Click **Create Account**.

A confirmation box will appear to show that you have created a user and to confirm that users details.

Account created

Your account he@therlowe.uk has been setup. In your e-mail program, use:

Username:

he@therlowe.uk

Password:

POP/IMAP Server:

pixel.mxrouting.net

SMTP Server:

pixel.mxrouting.net

CLOSE

This page also confirms your **POP/IMAP** and **SMTP** server addresses.

You can now close this page.

Find your DKIM Key

From the MXRouting web page, expand **Account Manager** and select **DKIM Keys**.

Here you can see your DKIM record.
