

Add Domain and User to MXRouting

Aug 2024

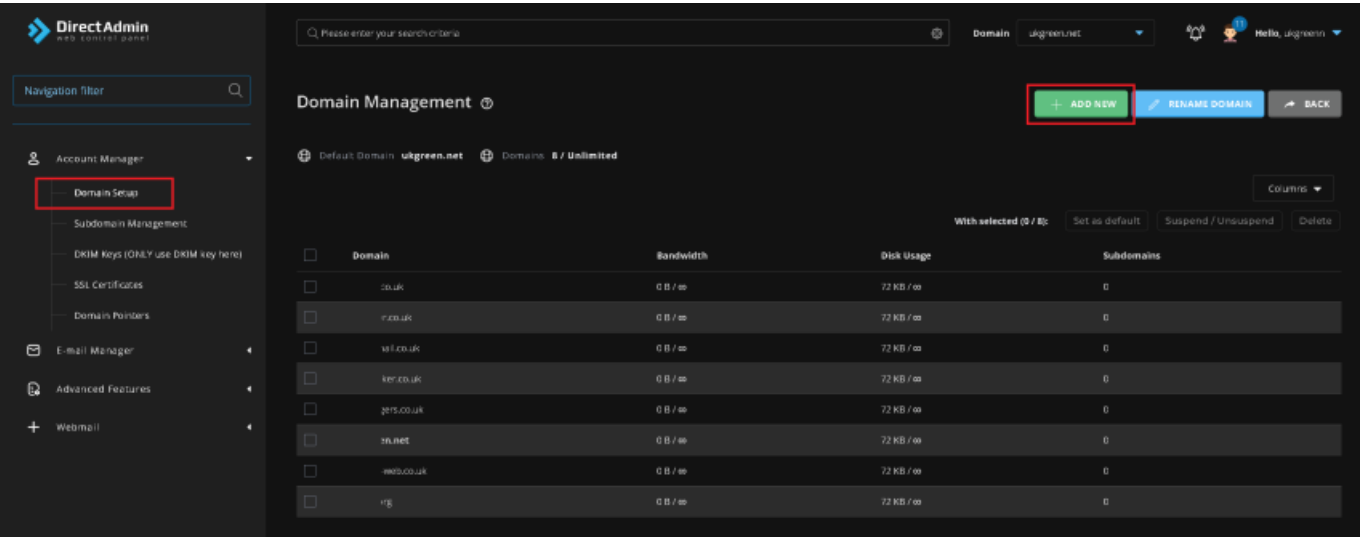

WARNING!!! - THIS GUIDE IS NOT YET COMPLETE!!! - WARNING!!!

Introduction

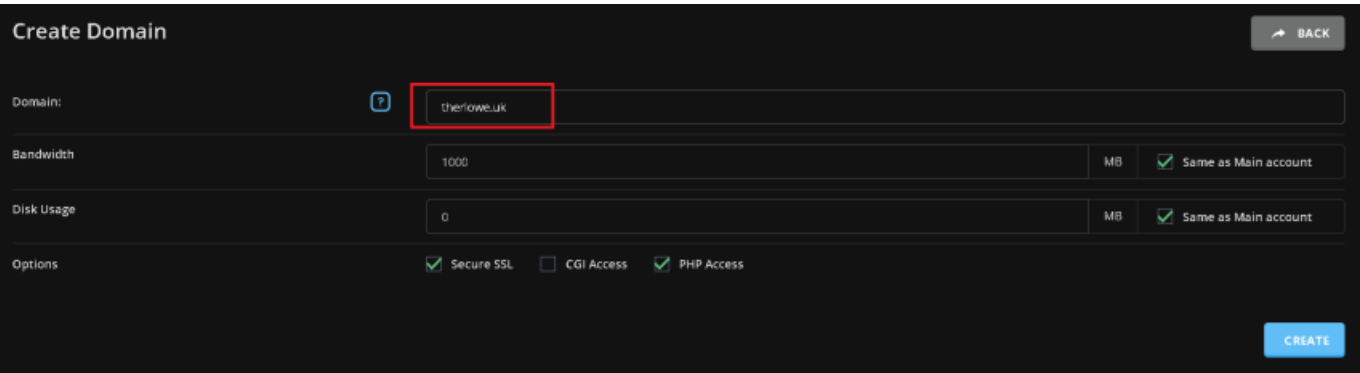

This is a quick overview on how to add a Domain and User to MXRouting, while this is pretty simple, we will be able to get the information we need for creating some mail records on our Domain host, which is very important.

Add Domain

Login to MXRouting MXRouting and go to Domain Setup.

Click Add New.

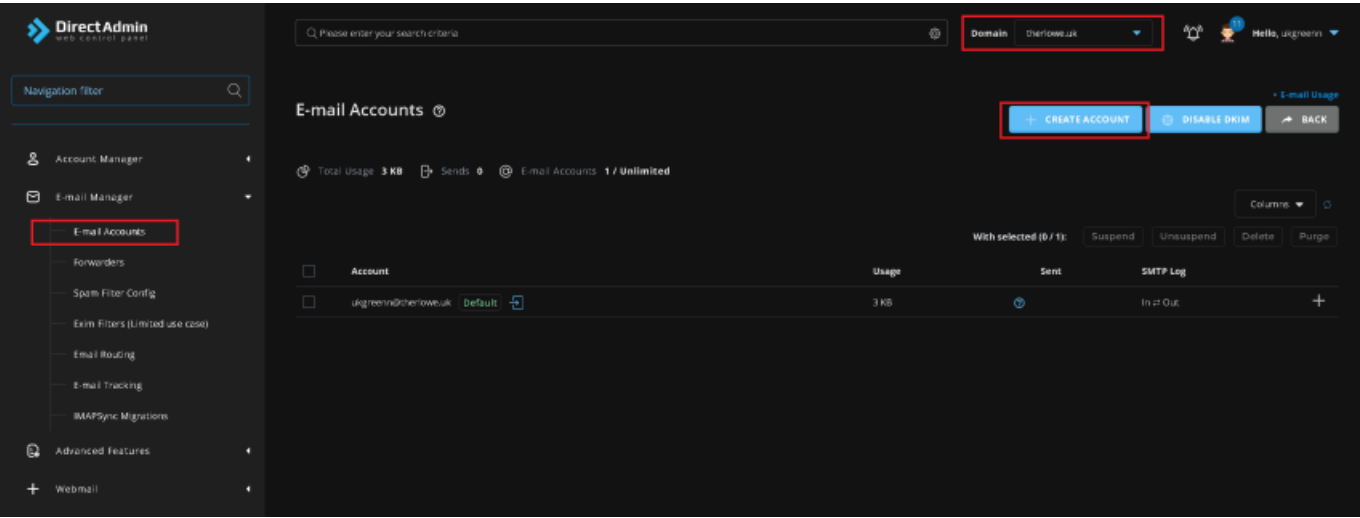

Enter the new Domain Name and click Create.

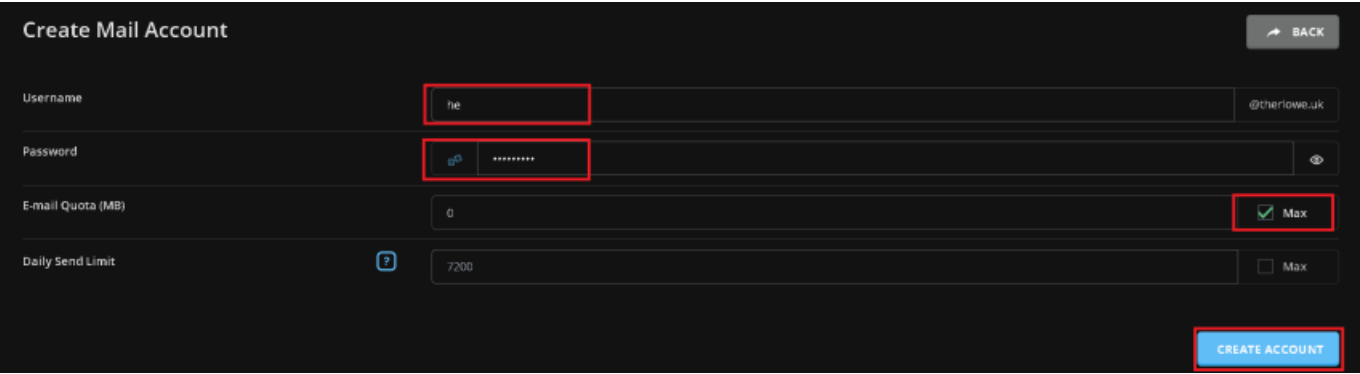

Add User

Now that we have created our Domain, we can add a user to it.

In MXRouting, expand the E-Mail Manager menu and select E-Mail Accounts.

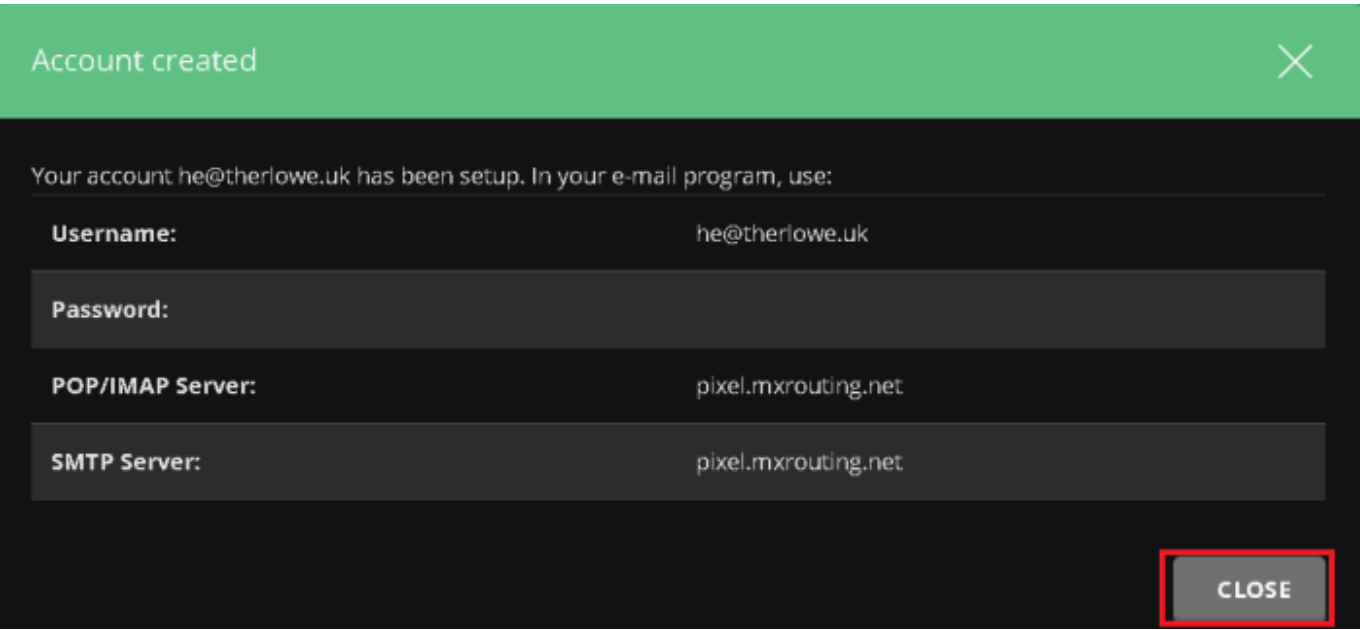

Ensure that in the Top Right of the screen you have the correct **Domain** selected (the one you just added). Then select **Create Account**. There will already be a default user here called ukgreenn that you can ignore.

Click **Create Account**.

A confirmation box will appear to show that you have created a user and to confirm that users details.

This page also confirms your **POP/IMAP** and **SMTP** server addresses.

You can now close this page.

Find your DKIM Key

From the MXRouting web page, expand **Account Manager** and select **DKIM Keys**.

DirectAdmin

Navigation filter

Account Manager

- Domain Setup
- Subdomain Management
- DKIM Keys (ONLY use DKIM key here)
- SSL Certificates
- Domain Pointers

Columns

With selected (0 / 10):

Delete

	Name	TTL	Type	Value
☐	thernow.uk.	NS		ns1.worlddomains.nl.
☐	thernow.uk.	NS		ns2.worlddomains.nl.
☐	thernow.uk.	3600	TXT	"v=spf1 include:mxroute.com ~all"
☐	x._domainkey	3600	TXT	"v=DKIM1; k=rsa; p=MIBJ4N8gqpkG9w0BAQFAAOCAQAMIBBgKCAQEAhnehykde9TmxE2xhG48MhY2IwdfvCMTg5fng4Tm7be0t9dHystbf0d4QO3S4d8cd8HQMK4hdwLWPa3g43PFw"
☐	ftp	3600	AAAA	2u014f824217cd0d02
☐	mail	3600	AAAA	2u014f824217cd0d02
☐	pop	3600	AAAA	2u014f824217cd0d02
☐	smtp	3600	AAAA	2u014f824217cd0d02
☐	thernow.uk.	3600	AAAA	2u014f824217cd0d02
☐	www	3600	AAAA	2u014f824217cd0d02

Here you can see your DKIM record. The DKIM record consists of 3 parts:

1. The Name

-

x._domainkey
2. The TTL

-

3600
3. The Type

-

TXT
4. The Value

-

This is the really long string you can see.

All of this information will be entered as a TXT Record in your domain provider (Porkbun).
