

Alma Linux PATH

Apr 2023

For our Alma Linux installers, the PATH value has to be correct, to check the PATH use the following command:

```
echo $PATH
```

If you used the MK official ISO then this will return an output similar to below:

```
/usr/local/sbin:/usr/local/bin:/usr/sbin:/usr/bin:/root/bin
```

The PATH should include **/usr/local/bin** for our installers to work.
