

Change Hostname

Jul 2017

To change the hostname in CentOS:

1. Using a text editor, open the server's `/etc/sysconfig/network` file.

```
HOSTNAME=myserver.domain.com
```

2. Modify the `HOSTNAME=` value to match your FQDN hostname.

```
HOSTNAME=myserver.domain.com  
or  
HOSTNAME=Packager
```

Save and restart.
