

Check Free Memory

2016

You can check how much free memory a Linux client/server has using the **free** command:

```
free
      total        used        free      shared    buffers     cached
Mem:    947876      316360      631516         8628       24544      156116
-/+ buffers/cache:    135700      812176
Swap:    102396           0       102396
```
