

# Command Line MySQL

Here are a few useful MySQL commands you can run from the command line, handy if you have installed MySQL and you don't have desktop access or a graphical MySQL manager application.

Login to MySQL First we must login

**mysql -u root -p** — (the **root** part assumes **root** is your mysql username)

Create a MySQL Database

**CREATE DATABASE new\_database;** — (don't forget the **semicolon ;** it's really important)

Show a MySQL Database

**SHOW DATABASES;**
