

Enable Remote Access to GPIO Pins

If you are using your Raspberry Pi via SSH or a Remote Desktop session, you need to enable remote access of the GPIO Pins, to do this from the command line, do the following:

```
sudo raspi-config
```

Raspberry Pi Software Configuration Tool (raspi-config)

- | | |
|--------------------------------|--|
| 1 Expand Filesystem | Ensures that all of the SD card storage is |
| 2 Change User Password | Change password for the default user (pi) |
| 3 Boot Options | Choose whether to boot into a desktop envi |
| 4 Wait for Network at Boot | Choose whether to wait for network connect |
| 5 Internationalisation Options | Set up language and regional settings to m |
| 6 Enable Camera | Enable this Pi to work with the Raspberry |
| 7 Add to Rastrack | Add this Pi to the online Raspberry Pi Map |
| 8 Overclock | Configure overclocking for your Pi |
| 9 Advanced Options | Configure advanced settings |
| 0 About raspi-config | Information about this configuration tool |

<Select>

<Finish>

Advanced Options:

Raspberry Pi Software Configuration Tool (raspi-config)

- | | | |
|-----------------|--|---|
| A1 Overscan | You may need to configure overscan if blac | ↑ |
| A2 Hostname | Set the visible name for this Pi on a netw | ■ |
| A3 Memory Split | Change the amount of memory made available | ▒ |
| A4 SSH | Enable/Disable remote command line access | ▒ |
| A5 SPI | Enable/Disable automatic loading of SPI ke | ▒ |
| A6 I2C | Enable/Disable automatic loading of I2C ke | ▒ |
| A7 Serial | Enable/Disable shell and kernel messages o | ▒ |
| A8 Audio | Force audio out through HDMI or 3.5mm jack | ▒ |
| A9 1-Wire | Enable/Disable one-wire interface | ▒ |
| AA GPIO Server | Enable/Disable remote access to GPIO pins | ↓ |

<Select>

<Back>

Select GPIO Server

Would you like the GPIO server to be accessible over the network?

<Yes>

<No>

You will get a confirmation that the GPIO Server is available.

Raspberry Pi Software Configuration Tool (raspi-config)

- | | |
|--------------------------------|--|
| 1 Expand Filesystem | Ensures that all of the SD card storage is |
| 2 Change User Password | Change password for the default user (pi) |
| 3 Boot Options | Choose whether to boot into a desktop envi |
| 4 Wait for Network at Boot | Choose whether to wait for network connect |
| 5 Internationalisation Options | Set up language and regional settings to m |
| 6 Enable Camera | Enable this Pi to work with the Raspberry |
| 7 Add to Rastrack | Add this Pi to the online Raspberry Pi Map |
| 8 Overclock | Configure overclocking for your Pi |
| 9 Advanced Options | Configure advanced settings |
| 0 About raspi-config | Information about this configuration tool |

<Select>

<Finish>

Now Select Finish - You will be back at the command prompt (you may need to reboot)
