

Gnome Desktop Scaling

Mar 2025

Introduction

After a default installation of Alma Linux 9 with the Desktop Environment, the default desktop is Gnome (at the time of writing). One of the issues with Gnome in v9 seems to be the default scaling of the desktop. I installed this on a laptop with a 2K display and everything was either too big or too small, mainly because the default scaling sizes were 100% or 200%
