

Installing gphoto2

Well luckily this couldn't be simpler. From a terminal, just use the following syntax.

```
sudo apt-get install gphoto2 -y
```

For some reason, this took around 2 minutes to install on my Raspberry Pi Zero, but it did successfully install. I got the following output during installation:

<sxh [text][; options for SyntaxHighlighter]> Reading package lists... Done Building dependency tree Reading state information... Done The following extra packages will be installed:

```
libaa1 libcdk5 libgpm2
```

Suggested packages:

```
gtkam gthumb gpm
```

The following NEW packages will be installed:

```
gphoto2 libaa1 libcdk5 libgpm2
```
