

# Origin Server Credential Test

This is a short document outlining a simple test to ensure that the credentials and publishing point in a multiscreen system are valid. For the Origin servers that we use in Demonstrations, WebDAV is used, and while there is a way to change the WebDAV password, there isn't a way that I have found to check the password. The following tool will allow this (it will allow you to test a password, but not find out what a password is if it is forgotten).

Cyberduck is the tool that we are going to use, and the homepage for the developer is as follows:
